Skills

Languages: JavaScript, TypeScript, Go, Dart, Python, SQL

Technologies & Tools: React, Next.js, Flutter, React Native, Angular, PostgreSQL, MongoDB, Express, Git, Docker, Stripe, Sentry

Infrastructure: AWS (EC2, SQS, RDS, CloudWatch, ECS), GCP (Cloud Run, Cloud SQL), RabbitMQ

Work Experience

PropSynk Inc. (Contract), Remote

January 2026 - Present

Full Stack Engineer

- Built backend services in Go for a property management platform, working across the lease, payments, and maintenance services as part of a 6-service Cloud Run backend.
- Set up JWT-based auth between internal services so they only accept verified requests from each other.
- Integrated DocuSign and Stripe to handle lease signing and rent payments end to end.
- Also shipped features on the React Native app, sharing code with the backend through a common monorepo.
- **Technologies:** Go, PostgreSQL, GCP Cloud Run, React Native, Stripe, DocuSign

Kredere Wealth Partners Public Ltd, Mumbai

October 2024 - September 2025

Senior Software Engineer

- Delivered Porto from concept to production in 8 weeks, enabling relationship managers to analyze sector concentration and risk metrics across 50+ client portfolios daily.
- Optimized data pipeline by migrating from CSV to Parquet format, achieving 70% size reduction and 3x faster processing for several portfolios worth Rs.500Cr+ AUM.
- Shipped B2B features including white-label theming and Session-based multi-tenancy, with 3 wealth management firms in evaluation phase.
- **Technologies:** Next.js, TypeScript, FastAPI, Redis, TanStack Query, Docker, TailwindCSS

Indian Energy Exchange, Mumbai

April 2024 - October 2024

Software Engineer

- Migrated a legacy module of the energy trading platform to a modern web stack, planning the cut-over carefully to avoid disrupting live trading sessions.
- Built a transaction auditing system with the compliance team, logging trade data to support regulatory reporting requirements.
- Built real-time data visualization components for the bid-placement system using Angular and RxJS, noticeably reducing trade execution latency and improving trader workflow
- **Technologies:** Angular, TypeScript, RxJS, SQL Server

Education

Manipal University Jaipur

Aug 2019 - Jun 2023

B.Tech in Electronics and Communication Engineering

CGPA: 8.0/10

Relevant Coursework: Object Oriented Programming, Databases, Data Structures & Algorithms, OS, Computer Networks

Project Work

- **Forge - Self-Hosted PaaS:** A self-hosted deployment platform for managing application deployments, similar to Coolify. Includes a dashboard for container orchestration, real-time log streaming, and deployment pipelines, backed by a Go API for Docker container management. *Technologies:* Next.js, TypeScript, Golang, Docker, PostgreSQL, Better Auth, WebSockets, TailwindCSS.
- **Zen Commit - CLI Tool:** An interactive CLI for creating Conventional Commits, with configurable scopes, optional emoji, and git hook support via a TOML config file. Distributed via Homebrew and Go install. *Technologies:* Go, Cobra, promptui.
